PROFESSIONAL SUMMARY

Full Stack Developer with experience building and deploying production web systems for construction and insurtech companies. Experienced in designing SaaS platforms with role-based authentication, real-time dashboards, custom business logic, and third-party integrations. Worked in production environments supporting 400+ active projects and 50+ operational users. Focused on scalable architecture, automation, and solving business problems through software.

TECHNICAL SKILLS

Frontend: React, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express, Firebase Functions, Python (scripting)

Databases: PostgreSQL, Firestore, Firebase Realtime Database

Geospatial: Mapbox GL JS

Tools & Infrastructure: Firebase Hosting, Git, REST APIs

PROFESSIONAL EXPERIENCE

Justo Pago Remodelaciones | Full Stack Developer | 2024 – 2026

- Designed and developed core modules for an internal enterprise management system used by ~50 operational users.
- Built inventory management system reducing manual tracking errors and improving material traceability.
- Implemented real-time material consumption tracking converted into project progress and cost metrics.
- Developed financial monitoring module improving budget visibility across multiple active projects.

- Automated dynamic generation of contracts, reports, and quotations in PDF format.
- Integrated ZapSign (digital signatures) and Twilio (automated notifications).

Justo Pago Remodelaciones | Junior Developer & QA | 2023 – 2024

- Ensured product stability through functional testing and deployment validation.
- Fixed critical UI and business logic issues.
- Developed geospatial project visualization module using Mapbox GL.
- Implemented real-time communication log using Firebase.
- Promoted to Full Stack Developer based on performance and product expertise.

FEATURED PROJECT

SOAT Sales Management System – CDA (Freelance, 2025)

- Architected and developed a full SaaS platform independently (frontend, backend, database, deployment).
- Implemented role-based authentication (Commercial Advisor / Administrator).
- Developed multi-payment sales module including credit providers with custom business logic.
- Built real-time dashboards with sales tracking by location, advisor, date, and payment method.
- Implemented financial reconciliation system for invoice and sales cross-checking
- Deployed production system using Firebase infrastructure.
- Built with Next.js, Node.js, Firestore, deployed on Firebase Hosting
